

MID WEST SYRUP COMPANY
2803 TERRACE, KANSAS CITY, MISSOURI 64108 (816) 531-7780

Shave Ice Flavor

A flavor only product that lets you make your own Syrup, developed because of the cost of freight. Use 4 ounces to flavor a gallon of Syrup. This will not have the gums that help our Ready -to-Use Sno Cone Syrups stick to the top of your ice.

	4 ounce bottle	Quart bottle	Gallon bottle
Flavors	\$2.75	\$ 18.00	\$ 64.00
optional Preservative	\$2.00	\$14.00	\$ 45.00

Mixing Directions

1. Fill a clean gallon container a little over $\frac{1}{2}$ full with water. (A gallon jug with cap will make step 3 easier. Warm water will dissolve sugar a little quicker.)
2. Pour 5 pounds of sugar into the water. (Some use 5.25 lbs.)
3. Shake container until the sugar is dissolved. (Let it sit to see if any solid sugar remains.)
4. Add 4 ounces of Shave Ice Flavor. (One bottle)
5. Add $\frac{1}{2}$ ounce Shave Ice Preservative (optional) to extend shelf life.
6. Add more water to fill container to one gallon.
7. Shake again.

You now have a gallon of Shave Ice Syrup ready to serve.
Consider letting the syrup cool - warm syrup melts your ice faster.
